Re: Scientific Chemical Processing
411 Wilson Avenue
Newark, New Jersey

Dear Ms. Feldstein:

This letter is in response to Mr. Labrizzi's Request for Information regarding the above site. As reported to you on March 9, records of transactions pertaining to material from this facility and Scientific Chemical Processing were previously submitted to EPA Region II in connection with a Request for Information regarding Lone Pine Landfill. We are submitting them again for your convenience only; as the recent Request for Information states that resubmission is not requested.

We note that the shipping records enclosed reflect only four transactions with an independent firm, Advanced Environmental Technology, Inc., which apparently arranged for transportation to, or disposal by Scientific Chemical Processing. While the Certificate of Disposal attached for three of the shipments states that those drums of material were transported to Scientific Chemical Processing and gives the 411 Wilson Avenue address, the New Jersey manifest forms for all four shipments reflect the destination facility as Scientific Chemical Processing, Paterson Plank Road, Carlstadt, New Jersey. The four shipments occurred during May, June, July and August, 1978, and reflect a total of 319 drums. The material is described in the shipping records enclosed. Also enclosed are those portions of a Selected Substances report filed by this facility in 1980 which reference Scientific Chemical Processing. However, as pointed out above, the shipping records located reflect transactions only with Advanced Environmental Technology Inc., which in turn appears to have contracted with Scientific Chemical Processing.
